

Referral & Capabilities Sheet

For discharge planners, case managers, and discharge RNs

Sweetwater Groves is a small, nurse-led residential assisted living home in North Scottsdale. We provide a calm, dignified place for a safe recovery after a hospital stay — with steady oversight that helps a patient you discharge today not become a readmission next week. We are used to working on a discharge timeline and aim to respond the same business day.

What we provide

- **Care levels:** daily personal care and supervision, assistance with bathing, dressing, mobility, and toileting.
- **Nurse-led oversight:** registered nurse leadership of care standards and family communication.
- **Medication management** handled daily, including new and changed prescriptions.
- **Private rooms** in a true home setting — quiet, sunlit, residential.
- **Recovery support** for the fragile first weeks after discharge (fall and readmission risk).

Continuity & coordination

- **Aging in place:** a short recovery stay can continue long-term — no second move.
- **Respite & short stays** available for safe recovery before a return home.
- **Smooth handoff:** we coordinate clinical details securely once fit is confirmed.
- **Same-business-day response** to referrals on a discharge timeline.
- **Tours welcome** — including on short notice when a discharge is approaching.

How to refer a patient

1. Call (602) 483-4039 or use the referral form at sweetwatergroves.com/for-discharge-planners
2. Share your contact info, the patient's initials, target discharge date, and a brief care summary
3. A member of our nurse-led team responds the same business day to confirm fit and next steps
